

What are the different clinical trial phases all about?

Phase 1

20-80
participants
over
several
months

Studies
the
Safety

70%
progress
to next
phase

Phase 2

100-300
participants
over almost
2 years

Studies
the
Efficacy

33%
progress
to next
phase

Phase 3

1000-3000
participants
over 1 to
4 years

Studies
Safety,
Efficacy
& Dosing

25-30%
progress
to next
phase

Phase 4

1000s
participants
over a
continuing
period

Studies
the
Longterm
Effectiveness

70-90%
stay on
the market
